

MACA

Healthcare

Affordable care. Faster access. Better health at every age.

MACA policy for Californians is simple: lower healthcare costs, shorten wait times, and deliver dependable care in every county for children, working families, and seniors.

- 1. Lower costs and out-of-pocket bills.** MACA will push down premiums, deductibles, surprise bills, and prescription costs so families stop delaying care because they cannot afford to walk through the door.
- 2. Faster appointments and more local access.** MACA will expand clinics, telehealth, mobile care, and provider recruitment so Californians can get primary care, specialists, and mental health services without long waits.
- 3. Protect mothers, babies, and early childhood health.** MACA will strengthen prenatal care, postpartum support, pediatric prevention, and nutrition services so healthy lives begin earlier and complications are caught sooner.
- 4. Strengthen children and teen mental health.** MACA will connect schools, parents, and community providers to deliver counseling, crisis support, substance-use prevention, and faster treatment for young people.
- 5. Support working-age adults and chronic disease care.** MACA will improve screening, diabetes and heart-health management, reproductive care, and coordinated treatment that fits the schedule of real working families.
- 6. Close rural and county healthcare gaps.** MACA will direct staffing incentives, technology, and access standards to underserved counties so rural and inland communities are no longer treated as second tier.
- 7. Help seniors age with dignity.** MACA will expand home-based care, fall prevention, caregiver support, dementia navigation, and county coordination so older Californians can age safely and with respect.

Note: Senior Californians In the age of 65 years plus will get health Insurance at 50% Discount.
